

TRANSMITTAL LETTER TO THE UNITED STATES
 DESIGNATED/ELECTED OFFICE (DO/EO/US)
 CONCERNING A FILING UNDER 35 U.S.C. 371

Attorney's Docket Number

05725.0481

U.S. Application No.

09/402796

International Application. No.	International Filing Date	Priority Date Claimed
PCT/FR98/02863	December 23, 1998	February 13, 1998

Title of Invention:

COSMETIC COMPOSITION COMPRISING AT LEAST ONE NONIONIC AMPHIPHILIC ASSOCIATIVE POLYURETHANE
 AND AT LEAST ONE ANIONIC POLYMER WITH FATTY CHAINS (As Amended)

Applicant(s) For DO/EO/US:

Christine DUPUIS

Applicant herewith submits to the United States Designated/Elected Office (DO/EO/US)
 the following items and other information:

1. [X] This is a FIRST submission of items concerning a filing under 35 U.S.C. 371.
2. [] This is a SECOND or SUBSEQUENT submission of items concerning a filing under 35 U.S.C. 371.
3. [] This express request to begin national examination procedures (35 U.S.C. 371(f)) at any time rather than delay examination until the expiration of the applicable time limit set in 35 U.S.C. 371(b) and PCT Articles 22 and 39(1).
4. [] A proper Demand for International Preliminary Examination was made by the 19th month from the earliest claimed priority date.
5. [X] A copy of the International Application as filed (35 U.S.C. 371(c)(2))
 - a. [] is transmitted herewith (required only if not transmitted by the International Bureau).
 - b. [X] has been transmitted by the International Bureau.
 - c. [] is not required, as the application was filed in the United States Receiving Office (RO/US).
6. [X] A translation of the International Application into English (35 U.S.C. 371(c)(2)).
7. [X] Amendments to the claims of the International Application under PCT Article 19 (35 U.S.C. 371(c)(3)).
 - a. [] are transmitted herewith (required only if not transmitted by the International Bureau).
 - b. [] have been transmitted by the International Bureau.
 - c. [] have not been made; however, the time limit for making such amendments has NOT expired.
 - d. [X] have not been made and will not be made.
8. [] A translation of the amendments to the claims under PCT Article 19 (35 U.S.C. 371(c)(3)).
9. [] An oath or declaration of the inventor(s) (35 U.S.C. 371(c)(4)).
10. [] A translation of the annexes to the International Preliminary Examination Report under PCT Article 36 (35 U.S.C. 371(c)(5)).

Items 11. to 16. below concern other document(s) or information included:

11. [] An Information Disclosure Statement under 37 CFR 1.97 and 1.98.
12. [] An assignment document for recording. A separate cover sheet in compliance with 37 CFR 3.28 and 3.31 is included.
13. [X] A FIRST preliminary amendment.
14. [] A SECOND or SUBSEQUENT preliminary amendment.
15. [] A substitute specification.
16. [] A change of power of attorney and/or address letter.
16. [] Other items or information:
 - a. [] Verified Small Entity Statement.
 - b. [] Copy of Notification of Missing Requirements.

17. [X] The following fees are submitted:

Basic National Fee (37 CFR 1.492(a)(1)-(5)):

Search Report has been prepared by the EPO or JPO.....\$840.00

International preliminary examination fee paid to

USPTO (37 CFR 1.482).....\$670.00

No international preliminary examination fee paid to

USPTO (37 CFR 1.482) but international search fee

paid to USPTO (37 CFR 1.445(a)(2)).....\$760.00

Neither international preliminary examination fee

(37 CFR 1.482) nor international search fee

(37 CFR 1.445(a)(2)) paid to USPTO.....\$970.00

Sir:

PRELIMINARY AMENDMENT

Prior to the examination of the above application, please amend this application
as follows:

IN THE TITLE:

Please amend the title to read: --COSMETIC COMPOSITION COMPRISING AT
LEAST ONE NONIONIC AMPHIPHILIC ASSOCIATIVE POLYURETHANE AND AT
LEAST ONE ANIONIC POLYMER WITH FATTY CHAINS--.

IN THE CLAIMS:

Please cancel claims 1-15 without prejudice or disclaimer.

Please add the following new claims 16-37:

- 16. A cosmetic composition comprising, in a cosmetically acceptable medium,
(A) at least one nonionic amphiphilic associative polyurethane

corresponding to formula (I):

(I)

in which

one of the radicals R_1 and R_2 is an alkyl group having 8 to 18 carbons and
the other group is an alkyl group having 1 to 6 carbons,

R_3 is a hydrocarbon-based radical having from 4 to 36 carbons,

R_4 is chosen from hydrogen and C_1 - C_6 alkyl radicals,

a and b are integers, independently, from 90 to 600, and

b ranges from 1 to 4, and

(B) at least one anionic polymer comprising at least one fatty-chain monomer unit.

17. The composition according to claim 16, wherein R_3 has from 6 to 10 carbons.

18. The composition according to claim 16, wherein R_4 is a hydrogen atom

19. The composition according to Claim 16, wherein the alkyl group having from 8 to 18 carbons is an octadecyl group and the alkyl group having from 1 to 6 carbons is a methyl group.

20. The composition according to claim 19, wherein the at least one nonionic amphiphilic associative polyurethane of formula (I) having the octadecyl group and the methyl group is obtained by polycondensation of hexamethylene diisocyanate and polyethylene glycol.

21. The composition according to claim 16, wherein the at least one nonionic amphiphilic associative polyurethane of formula (I) is in a solution or suspension in water, which also contains chemically, enzymatically or microbiologically modified soluble starch.

22. The composition according to claim 16, wherein the at least one anionic polymer comprising at least one fatty-chain monomer unit comprises at least one unit

that is derived from carboxylic acids, phosphonic acids, sulphonic acids, or mixtures thereof.

23. The composition according to claim 22, wherein the carboxylic acids are chosen from acrylic acids, methacrylic acids, crotonic acids, maleic acids, fumaric acids and itaconic acids.

24. The composition according to claim 22, wherein the phosphonic acids are chosen from vinylphosphonic acid and styrenephosphonic acid.

25. The composition according to claim 22, wherein the sulphonic acids are chosen from vinylsulphonic acid and styrenesulphonic acid.

26. The composition according to claim 16, wherein the at least one anionic polymer comprises at least one fatty chain that is derived from monomers comprising at least one linear or branched C₈-C₂₂ alkyl chain.

27. The composition according to claim 26, wherein the at least one linear or branched C₈-C₂₂ alkyl chain is chosen from C₈-C₂₂ alkyl acrylates or methacrylates, and vinyl esters of higher C₈-C₂₂ fatty acids.

28. The composition according to claim 16, wherein the at least one anionic polymer comprising at least one unit derived from a fatty-chain monomer also contains at least one nonionic unit.

29. The composition according to Claim 28, wherein the at least one nonionic unit is derived from monomers chosen from vinyl monomers, olefinic monomers, styrene monomers, acrylic monomers, and methacrylic monomers.

30. The composition according to claim 16, wherein the at least one nonionic amphiphilic associative polyurethane of formula (I) is present in an amount of from 0.1 to 10 % by weight of active material relative to the total weight of the composition.

31. The composition according to claim 30, wherein the at least one nonionic amphiphilic associative polyurethane of formula (I) is present in an amount of from 0.5 to 5 % by weight of active material relative to the total weight of the composition.

32. The composition according to claim 16, wherein the at least one anionic polymer comprising at least one unit derived from a fatty-chain monomer is present in an amount of from 0.01 to 10 % by weight of active material relative to the total weight of the composition.

33. The composition according to claim 32, wherein the at least one anionic polymer comprising at least one fatty-chain monomer unit is present in an amount of from 0.1 to 5% by weight of active material relative to the total weight of the composition.

34. The composition according to claim 16, wherein the weight ratio of the nonionic amphiphilic associative polyurethane of formula (I) and the anionic polymer comprising at least one fatty-chain monomer unit ranges from about 90/10 to 10/90.

35. A leave-in haircare gel or styling gel comprising, in a cosmetically acceptable medium:

(A) at least one nonionic amphiphilic associative polyurethane corresponding to formula (I):

(I)

in which

one of the radicals R_1 and R_2 is an alkyl group having 8 to 18 carbons and the other group is an alkyl group having 1 to 6 carbons,

R_3 is a hydrocarbon-based radical having from 4 to 36 carbons,

R_4 is chosen from hydrogen and C_1 - C_6 alkyl radicals,

a ranges, independently, from 90 to 600, and

b ranges from 1 to 4, and

(B) at least one anionic polymer comprising at least one fatty-chain monomer unit.

36. A process of thickening a cosmetic composition comprising adding to said composition:

(A) at least one nonionic amphiphilic associative polyurethane corresponding to formula (I):

(I)

in which

one of the radicals R_1 and R_2 is an alkyl group having 8 to 18 carbons and the other group is an alkyl group having 1 to 6 carbons,

R_3 is a hydrocarbon-based radical having from 4 to 36 carbons,

R_4 is a hydrogen atom or a C_1-C_6 alkyl radical,

a ranges, independently, from 90 to 600, and

b is from 1 to 4, and

(B) at least one anionic polymer comprising at least one fatty-chain monomer unit

wherein (A) and (B) are added in a combined amount effective to thicken said composition.

37. A process for treating hair comprising applying to said hair composition comprising, in a cosmetically acceptable medium:

(A) at least one nonionic amphiphilic associative polyurethane corresponding to formula (I):

(I)

in which

one of the radicals R_1 and R_2 is an alkyl group having 8 to 18 carbons and the other group is an alkyl group having 1 to 6 carbons,

R_3 is a hydrocarbon-based radical having from 4 to 36 carbons,

R_4 is chosen from hydrogen and C_1 - C_6 alkyl radicals,

a ranges, independently, from 90 to 600, and

b ranges from 1 to 4, and

(B) at least one anionic polymer comprising at least one fatty-chain monomer unit

and drying the hair without rinsing said composition from the hair.--

REMARKS

Claims 1 to 15 have been canceled and replaced by new claims 16 to 37.

Support for these new claims can be found in the original specification and claims.

Care has been taken so that no new matter has been added. Applicant now awaits an action on the merits.

Attorney Docket No. 5725.0481-00
Serial No. NOT YET ASSIGNED

Please grant any extensions and charge any additional required fees to our
deposit account 06-0916 if necessary.

Respectfully submitted,

Cosmetic composition based on associative polyurethanes
and fatty-chain anionic polymers

The present invention relates to cosmetic
5 compositions containing a novel system for thickening
aqueous media based on associative polyurethanes and
fatty-chain anionic polymers, as well as to their use
as leave-in haircare gels or styling gels.

The thickening and/or gelation of aqueous
10 media with polymers has been an important subject of
cosmetic research for a long time. The production of an
advantageous thickening effect with a water-soluble
polymer generally assumes a high molar mass and a large
hydrodynamic volume. The gelation of an aqueous medium
15 is thus considered as the result of a three-dimensional
polymer network obtained by crosslinking linear
polymers or by copolymerizing bifunctional and
polyfunctional monomers. However, the use of such
polymers of very high molar mass poses a certain number
20 of problems, such as the relatively unpleasant texture
and the difficulty in spreading the gels obtained.

One advantageous approach consisted in using,
as thickeners, polymers capable of reversibly
associating with each other or with other molecules or
25 particles. This physical association gives rise to
thixotropic or rheofluidizing macromolecular systems,

i.e. systems whose viscosity depends on the shear forces to which they are subjected.

Such polymers capable of reversibly associating with each other or with other molecules are known as "associative polymers". The interaction forces in play can be of very different nature, for example of electrostatic nature, of hydrogen-bond type or hydrophobic interactions.

One specific case of associative polymers is amphiphilic polymers, i.e. polymers comprising one or more hydrophilic portions which make them soluble in water, and one or more hydrophobic zones via which the polymers interact and assemble with each other or with other molecules.

It is known practice to prepare hair compositions in gel form using, as thickening system, such associative amphiphilic polymers, in conjunction with surfactants. It is thought that the advantageous rheological properties of the gels thus obtained are due to the formation of mixed micelles containing the surfactants and the hydrophobic portions of the amphiphilic polymers, these micelles constituting a multitude of physical crosslinking points.

However, these compositions based on associative polymers and surfactants do not always have the desired cosmetic properties. Thus, the presence of surfactants, even in small amounts, can adversely modify the cosmetic properties of the said

compositions, such as the properties of application or of feel after drying. Moreover, in particular in the sector of leave-in care gels or styling gels, it is important to be able to distribute the product
5 uniformly over the entire head of hair so as to avoid the overloads and the cosmetic defects resulting therefrom.

European patent application EP-A-0,412,705 describes cosmetic compositions, in particular cosmetic
10 hair compositions, using, as thickening system, nonionic water-soluble polymers modified by introduction of fatty chains, in combination with one or more natural or synthetic water-soluble polymers.

French patent application FR-A-2,733,910
15 discloses compositions for styling mousses containing, in combination, at least one anionic polymer and at least one associative polyurethane, at least one of these two polymers having foaming power, so as to improve the properties of the mousses obtained.

20 It has now been discovered that it is possible to obtain a good thickening, or even gelling, effect and advantageous cosmetic properties by combining associative amphiphilic polyurethanes with anionic polymers comprising at least one fatty-chain
25 monomer unit.

The gel obtained by combining these two types of polymer has a very creamy texture and is pleasant to apply. The final feel on dried hair is more pleasant

and less laden. The gel moreover has excellent styling power.

One subject of the present invention is thus a cosmetic composition comprising at least one nonionic
5 associative polyurethane in combination with at least one anionic polymer comprising at least one fatty-chain monomer unit.

Another subject of the present invention is the use of the combination of at least one nonionic
10 associative polyurethane and at least one anionic polymer comprising at least one fatty-chain monomer unit, as a thickening system for cosmetic compositions.

A third subject of the invention is a cosmetic process for treating the hair using a cosmetic
15 composition obtained by combining at least one nonionic associative polyurethane and at least one anionic polymer comprising at least one fatty-chain monomer unit.

Other subjects will become apparent on
20 reading the description and the examples which follow.

The cosmetic compositions in accordance with the invention are essentially characterized in that they contain, in a cosmetically acceptable medium,
(A) at least one amphiphilic nonionic associative
25 polyurethane corresponding to the general formula

(I)

in which

one of the residues R_1 and R_2 represents a higher C_8-C_{18} alkyl group and the other represents a lower C_1-C_6 alkyl group,

R_3 represents a C_4-C_{36} , preferably C_6-C_{10} , hydrocarbon-based radical,

R_4 represents a hydrogen atom or a C_1-C_6 alkyl radical, preferably a hydrogen atom,

a ranges, independently, from 90 to 600, and

b is from 1 to 4, and

(B) at least one anionic polymer comprising at least one fatty-chain monomer unit.

According to the invention, the expression "lower C_1-C_6 alkyl group" means an alkyl group containing a linear or branched chain comprising from 1 to 6 carbon atoms, such as methyl, ethyl, n-propyl, n-butyl, n-pentyl and n-hexyl radicals, as well as the corresponding branched isomers.

In accordance with the invention, the higher C_8-C_{18} alkyl groups denote alkyl groups containing a linear or branched chain comprising from 8 to 18 carbon atoms, such as octyl, nonyl, decyl, undecyl, dodecyl,

tridecyl, tetradecyl, pentadecyl, hexadecyl, heptadecyl and octadecyl radicals.

In one preferred embodiment, one of the alkyl radicals R_1 and R_2 in an α - ω position represents an octadecyl group and the other represents a methyl group. The associative polyurethanes used in the compositions of the present invention are used in the form of an aqueous suspension or solution optionally containing a certain amount of soluble starch. This starch can be any starch extracted from natural sources, such as wheat starch, corn starch, rice starch, potato starch, etc., and which has been chemically, enzymatically or microbiologically modified so as to be soluble in water.

A preferred polymer is sold by the company Rohm & Haas under the name Acrysol 46. It is a polyurethane obtained by coupling hexamethylene diisocyanate and polyethylene glycol, and bearing at its ends, respectively, on average one methyl residue and one octadecyl residue. This polymer is in the form of an aqueous solution containing 15% by weight of active polyurethane material and also containing 3-5% of an enzymatically modified starch matrix.

The fatty-chain anionic polymers of the present invention constituting the component (B) are, in particular, polymers comprising units derived from carboxylic acids, from phosphonic acids or from

sulphonic acids, and at least one unit bearing a fatty chain.

The anionic groups are chosen, for example, from groups derived from carboxylic acids, such as acrylic acid, methacrylic acid, crotonic acid, maleic acid, fumaric acid or itaconic acid, sulphonic acids, such as vinylsulphonic acid or styrenesulphonic acid, or phosphonic acids, such as vinylphosphonic acid or styrenephosphonic acid.

The fatty-chain anionic polymers of the present invention can also contain one or more nonionic units that are well known in the art, for example units derived from vinyl, olefinic, styrene, acrylic or methacrylic monomers. Examples of such monomers which may be mentioned are ethylene, propylene, styrene, vinyl acetate and alkyl acrylates and methacrylates.

The fatty chains are linear or branched C_8 - C_{22} alkyl groups. They can be derived from monomers such as C_8 - C_{22} alkyl acrylates or methacrylates or vinyl esters of higher C_8 - C_{22} fatty acids.

The fatty-chain anionic polymers of the present invention can be prepared by copolymerizing anionic monomers and monomers comprising at least one fatty chain, and optionally nonionic monomers. It may also be envisaged to prepare them by introducing the anionic groups and the fatty chains by grafting or chemical modification of natural or synthetic polymers.

Examples of preferred anionic polymers of the present invention which may be mentioned are terpolymers of acrylic acid, vinylpyrrolidone and C_8 - C_{18} alkyl methacrylate, for example lauryl methacrylate, 5 such as the product sold under the name Acrylidone LM by the company ISP; terpolymers of vinyl acetate, monoisobutyl maleate and a C_{10} - C_{20} vinyl alkanoate, for example vinyl neodecanoate, such as the product sold under the name Meypro-Fix 509 by the company Rhône 10 Poulenc Surfactants; and the terpolymers of vinyl acetate, of crotonic acid and of a C_{10} - C_{20} vinyl alkanoate, for example vinyl neodecanoate, such as the product sold under the name National 28-2930 by the company National Starch.

15 According to the invention, the associative polyurethanes and the fatty-chain polymers are used in amounts which are sufficient to obtain satisfactory thickening or gelation of the aqueous medium.

An amount of associative polyurethanes of 20 between 0.1 and 10% by weight, and preferably between 0.5 and 5% by weight, expressed as active material and relative to the total weight of the composition, is recommended in particular.

In the compositions of the present invention, 25 the anionic polymers comprising at least one fatty chain are present in a proportion of from 0.01 to 10% by weight, preferably in a proportion of from 0.1 to 5%

by weight, of active material relative to the total weight of the composition.

In the present invention, the ratio of the said nonionic associative polyurethane (A) of formula (I) to the said anionic polymer comprising at least one fatty-chain monomer unit (B) is preferably within the range from 90/10 to 10/90.

The cosmetically acceptable medium preferably consists of water and can also contain cosmetically acceptable solvents, for example lower monoalcohols such as ethanol or isopropanol, glycols such as diethylene glycol, glycol ethers such as ethylene glycol alkyl ether or diethylene glycol alkyl ether, or alternatively fatty acid esters, all these solvents being used alone or in the form of a mixture.

The haircare or styling gels can also contain one or more additives commonly used in such hair compositions. Examples which may be mentioned are fragrances, dyes, preserving agents, sunscreens, vitamins, pH regulators, etc. It is clearly understood that the choice of these compounds should take into account any interactions with the thickening system. A person skilled in the art will take care to ensure that the addition of these additives will not have an unfavourable effect on the advantageous properties of the compositions obtained by virtue of the present invention.

A preferred cosmetic process for treating the hair, according to the invention, consists in applying and uniformly distributing the compositions described above on the hair and in drying the hair thus treated
5 without rinsing it.

The examples which follow are intended to illustrate the invention without thereby being limiting in nature.

10 **Example 1**

The aqueous compositions below are prepared:

Acrysol 46, a product sold by the company Rohm & Haas, a polyurethane obtained by coupling
15 hexamethylene diisocyanate and polyethylene glycol, and bearing at its ends, respectively, on average one methyl residue and one octadecyl residue. The resin National 28-2930 sold by the company National Starch is an anionic terpolymer obtained by copolymerizing vinyl
20 acetate, crotonic acid and vinyl neodecanoate.

This example shows that the combination of the preferred associative polyurethane of the present invention (Acrysol 46) and a fatty-chain anionic polymer (National 28-2930) makes it possible to obtain
25 a gel which has excellent cosmetic properties. Hair treated with this composition A is easy to disentangle and feels smooth and supple.

It is noted that Acrysol 46 alone
(composition B) has no appreciable thickening effect,
let alone a gelling effect.

Composition A also has the advantage of being
5 creamy and non-greasy and of not being sticky.

Example 2

A care gel having the composition below was
10 prepared:

Acrysol 46	2% active material
Acrylidone LM*	1% active material
2-Amino-2-methyl-1-propanol	qs neutralization
Fragrance, dye, preserving	
15 agent and demineralized water	qs 100 g

*Acrylidone LM is an anionic terpolymer obtained by
copolymerizing acrylic acid, vinylpyrrolidone and
lauryl methacrylate (68/23/9%), sold by the company
I.S.P.

20

Example 3

A care gel having the composition below was
prepared:

25 Acrysol 46	2% active material
Acrylidone LM	2% active material
2-Amino-2-methyl-1-propanol	qs neutralization
Fragrance, dye, preserving	

agent and demineralized water qs 100 g

Example 4

5 A care gel having the composition below was
prepared:

Acrysol 46 3% active material

Meypro-Fix 509* 2% active material

2-Amino-2-methyl-1-propanol qs neutralization

10 Fragrance, dye, preserving

agent and demineralized water qs 100 g

Meypro-Fix 509 is an anionic terpolymer of vinyl acetate, monoisobutyl maleate and vinyl neodecanoate.

15 sold by the company Rhône-Poulenc Surfactants.

It is clearly understood that the description hereinabove has been given for purely illustrative purposes and without any limitation being implied, and that variants or modifications may be made in the context of the present invention.

CLAIMS

1. Cosmetic composition, characterized in that it comprises, in a cosmetically acceptable medium,
- 5 (A) at least one amphiphilic nonionic associative polyurethane corresponding to the general formula

(I)

in which

- 10 one of the residues R_1 and R_2 represents a higher C_8-C_{18} alkyl group and the other represents a lower C_1-C_6 alkyl group,
- R_3 represents a C_4-C_{36} , preferably C_6-C_{10} , hydrocarbon-based radical,
- 15 R_4 represents a hydrogen atom or a C_1-C_6 alkyl radical, preferably a hydrogen atom,
- a ranges, independently, from 90 to 600, and
- b is from 1 to 4, and
- (B) at least one anionic polymer comprising at least
- 20 one unit derived from a fatty-chain monomer.

2. Cosmetic composition according to Claim 1, characterized in that the component (A) is a nonionic associative polyurethane in which, on average,

one of the radicals R_1 and R_2 in an α - ω position represents an octadecyl group and the other represents a methyl group.

3. Cosmetic composition according to Claim 1 or 2, characterized in that the component (A) is in the form of a solution or suspension in water also containing chemically, enzymatically or microbiologically modified soluble starch.

4. Cosmetic composition according to either of Claims 1 and 2, characterized in that the polymers constituting the component (B) comprise units derived from carboxylic acids, from phosphonic acids or from sulphonic acids, and at least one unit bearing a fatty chain.

5. Composition according to Claim 4, characterized in that the anionic groups are chosen from groups derived from carboxylic acids, such as acrylic acid, methacrylic acid, crotonic acid, maleic acid, fumaric acid or itaconic acid, groups derived from sulphonic acids, such as vinylsulphonic acid or styrenesulphonic acid, and groups derived from phosphonic acids, such as vinylphosphonic acid or styrenephosphonic acid.

6. Composition according to any one of Claims 1 to 5, characterized in that the units comprising a fatty chain are derived from monomers

comprising at least one linear or branched C₈-C₂₂ alkyl chain.

7. Composition according to Claim 6, characterized in that the said monomer bearing at least one alkyl chain is chosen from C₈-C₂₂ alkyl acrylates or methacrylates or vinyl esters of higher C₈-C₂₂ fatty acids.

8. Composition according to any one of Claims 1 to 7, characterized in that the said fatty-chain anionic polymers also contain nonionic units.

9. Composition according to Claim 8, characterized in that the said nonionic units are derived from vinyl, olefinic, styrene, acrylic or methacrylic monomers.

10. Composition according to any one of Claims 1 to 9, characterized in that it contains the component (A) in a proportion of from 0.1 to 10% by weight, and preferably from 0.5 to 5% by weight, expressed as active material relative to the total weight of the composition.

11. Composition according to any one of Claims 1 to 10, characterized in that it contains the component (B) in a proportion of from 0.01 to 10% by weight, preferably in a proportion of from 0.1 to 5% by weight, of active material relative to the total weight of the composition.

12. Composition according to any one of Claims 1 to 11, characterized in that the weight ratio of the said nonionic associative polyurethane of formula (I) to the said anionic polymer comprising at least one fatty-chain monomer unit is within the range from 90/10 to 10/90.

13. Composition according to any one of Claims 1 to 12, characterized in that it is in the form of a leave-in haircare gel or styling gel.

10 14. Use of the combination of a nonionic associative polyurethane of formula (I) and an anionic polymer comprising at least one fatty chain, as a system for thickening a cosmetic composition.

15 15. Cosmetic process for treating the hair, characterized in that the composition defined according to any one of Claims 1 to 13 is applied to the hair and the hair thus treated is dried without rinsing it.

French Language Declaration

POUVOIRS: En tant que l'inventeur cité, je désigne par la présente l'(les) avocat(s) et/ou agent(s) suivant(s) pour qu'ils poursuive(nt) la procédure de cette demande de brevet et traite(nt) toute affaire s'y rapportant avec L'Office des brevets et des marques: (*mentionner le nom et le numéro d'enregistrement*).

POWER OF ATTORNEY: As a named inventor, I hereby appoint the following attorney(s) and/or agent(s) to prosecute this patent application and transact all business in the Patent and Trademark Office connected therewith: (*list name and registration number*):

FINNEGAN, HENDERSON, FARABOW, GARRETT & DUNNER, L.L.P., Reg. No. 22,540, Douglas B. Henderson, Reg. No. 20,291; Ford F. Farabow, Jr., Reg. No. 20,630; Arthur S. Garrett, Reg. No. 20,338; Donald R. Dunner, Reg. No. 19,073; Brian G. Brunsvold, Reg. No. 22,593; Tipton D. Jennings, IV, Reg. No. 20,645; Jerry D. Voight, Reg. No. 23,020; Laurence R. Hefter, Reg. No. 20,827; Kenneth E. Payne, Reg. Déclaration et Pouvoir pour Demand de Brevet

French Language Declaration

En tant que l'inventeur nommé ci-après, je déclare par le présent acte que:

As a below named inventor, I hereby declare that:

Mon domicile, mon adresse postale et ma nationalité sont ceux figurant ci-dessous à côté de mon nom.

My residence, post office address and citizenship are as stated next to my name.

Je crois être le premier inventeur original et unique (si un seul nom est mentionné ci-dessous), ou l'un des premiers co-inventeurs originaux (si plusieurs noms sont mentionnés ci-dessous) de l'objet revendiqué, pour lequel une demande de brevet a été déposée concernant l'invention intitulée

I believe I am the original, first and sole inventor (if only one name is listed below) or an original, first and joint inventor (if plural names are listed below) of the subject matter which is claimed and for which a patent is sought on the invention entitled

COSMETIC COMPOSITION COMPRISING AT LEAST ONE NONIONIC AMPHIPHILIC ASSOCIATIVE POLYURETHANE AND AT LEAST ONE ANIONIC POLYMER WITH FATTY CHAINS (As Amended)

et dont la description est fournie ci-joint à moins que la case suivante n'ait été cochée:

the specification of which is attached hereto unless the following box is checked:

a été déposée le _____
sous le numéro de demande des Etats-Unis ou le
numéro de demande international PCT
_____ et modifiée
_____ (les cas échéant).

☒ was filed on December 23, 1998 as United States Application Number or PCT International Application Number PCT/FR98/02863 and was amended on October 12, 1999 (if applicable).

Je déclare par le présent acte avoir passé en revue et compris le contenu de la description ci-dessus, revendications comprises, telles que modifiées par toute modification dont il aura été fait référence ci-dessus.

I hereby state that I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred to above

Je reconnais devoir divulguer toute information pertinente à la brevetabilité, comme défini dans le Titre 37, § 1.56 du Code fédéral des réglementations.

I acknowledge the duty to disclose information which is material to patentability as defined in Title 37, Code of Federal Regulations, § 1.56.

TRANSMITTAL LETTER TO THE UNITED STATES DESIGNATED/ELECTED OFFICE (DO/EO/US) CONCERNING A FILING UNDER 35 U.S.C. 371		Attorney's Docket Number: 05725.0481-00000
International Application No.: PCT/FR98/02863		U.S. Application No.: 09/402,796
International Filing Date: December 23, 1998		Priority Date Claimed: February 13, 1998

Title of Invention:

COSMETIC COMPOSITION COMPRISING AT LEAST ONE NONIONIC AMPHIPHILIC
ASSOCIATIVE POLYURETHANE AND AT LEAST ONE ANIONIC POLYMER WITH FATTY CHAINS

Applicant(s) For DO/EO/US: Christine DUPUIS

Applicant herewith submits to the United States Designated/Elected Office (DO/EO/US) the following items and other information:

1. ☐ This is a FIRST submission of items concerning a filing under 35 U.S.C. 371.
2. ☒ This is a SECOND or SUBSEQUENT submission of items concerning a filing under 35 U.S.C. 371.
3. ☐ This express request to begin national examination procedures (35 U.S.C. 371(f)) at any time rather than delay examination until the expiration of the applicable time limit set in 35 U.S.C. 371(b) and PCT Articles 22 and 39(I).
4. ☐ A proper Demand for International Preliminary Examination was made by the 19th month from the earliest claimed priority date.
5. ☐ A copy of the International Application as filed (35 U.S.C. 371(c)(2))
 - a. ☐ is transmitted herewith (required only if not transmitted by the International Bureau).
 - b. ☐ has been transmitted by the International Bureau.
 - c. ☐ is not required, as the application was filed in the United States Receiving Office (RO/US).
6. ☐ A translation of the International Application into English (35 U.S.C. 371(c)(2)).
7. ☐ Amendments to the claims of the International Application under PCT Article 19 (35 U.S.C. 371(c)(3)).
 - a. ☐ are transmitted herewith (required only if not transmitted by the International Bureau).
 - b. ☐ have been transmitted by the International Bureau.
 - c. ☐ have not been made; however, the time limit for making such amendments has NOT expired.
 - d. ☐ have not been made and will not be made.
8. ☐ A translation of the amendments to the claims under PCT Article 19 (35 U.S.C. 371(c)(3)).
9. ☒ An oath or declaration of the inventor(s) (35 U.S.C. 371(c)(4)).
10. ☐ A translation of the annexes to the International Preliminary Examination Report under PCT Article 36 (35 U.S.C. 371(c)(5)).

Items 11. to 16. below concern other document(s) or information included:

11. ☒ An Information Disclosure Statement under 37 CFR 1.97 and 1.98.
12. ☒ An assignment document for recording. A separate cover sheet in compliance with 37 CFR 3.28 and 3.31 is included.
13. ☐ A FIRST preliminary amendment.
☐ A SECOND or SUBSEQUENT preliminary amendment.
14. ☐ A substitute specification.
15. ☐ A change of power of attorney and/or address letter.
16. ☐ Other items or information:
 - a. ☐ Verified Small Entity Statement.
 - b. ☐ Copy of Notification of Missing Requirements.

				CALCULATIONS
17. <input type="checkbox"/> The following fees are submitted:				
Basic National Fee (37 CFR 1.492(a)(1)-(5)):				
Search Report has been prepared by the EPO or JPO				\$ 840.00
International preliminary examination fee paid to USPTO (37 CFR 1.482)				\$ 670.00
No international preliminary examination fee paid to USPTO (37 CFR 1.482) but international search fee paid to USPTO (37 CFR 1.445(a)(2))				\$ 760.00
Neither international preliminary examination fee (37 CFR 1.482) nor international search fee (37 CFR 1.445(a)(2)) paid to USPTO				\$ 970.00
International preliminary examination fee paid to USPTO (37 CFR 1.482) and all claims satisfied provisions of PCT Article 33(1)-(4)				\$ 96.00
ENTER APPROPRIATE BASIC FEE AMOUNT ==				\$
Surcharge of \$130.00 for furnishing the oath or declaration later than <input checked="" type="checkbox"/> 20 <input type="checkbox"/> 30 months from the earliest claimed priority date (37 CFR 1.492(e)).				\$ 130.00
Claims	Number Filed	Number Extra	Rate	
Total Claims	- 20=		X \$18.00	\$
Independent Claims	- 3=		X \$78.00	\$
Multiple dependent claim(s) (if applicable)			+ \$260.00	\$
TOTAL OF ABOVE CALCULATIONS ==				\$ 130.00
Reduction by 1/2 for filing by small entity, if applicable. Verified Small Entity statement must also be filed. (Note 37 CFR 1.9, 1.27, 1.28).				\$
SUBTOTAL ==				\$ 130.00
Processing fee of \$130.00 for furnishing the English translation later than <input type="checkbox"/> 20 <input type="checkbox"/> 30 months from the earliest claimed priority date (37 CFR 1.492(f)).				\$
TOTAL NATIONAL FEE ==				\$ 130.00
Fee for recording the enclosed assignment (37 CFR 1.21(h)). The assignment must be accompanied by an appropriate cover sheet (37 CFR 3.28, 3.31). \$40.00 per property				\$ 40.00
TOTAL FEES ENCLOSED ==				\$ 170.00
Amount to be refunded				\$
Charged				\$

- a. ☒ A check in the amount of \$ 130.00 to cover the surcharge fee and a check in the amount of \$ 40.00 to cover the Assignment recordation fee are enclosed.
- b. ☐ Please charge our Deposit Account No. 06-0916 in the amount of \$ _____ to cover the above fees. A duplicate copy of this sheet is enclosed.
- c. ☒ The Commissioner is hereby authorized to charge any additional fees which may be required, or credit any overpayment to Deposit Account No. 06-0916. A duplicate copy of this sheet is enclosed.
